PRODUCT DATA SHEET

Nokia Intellisync Mobile

- Enterprise-wide support for a wide range of key mobile devices over any network
- Rich complement of personal information management capabilities
- Device management tools for effective control
- Mobile security and policy enforcement

## The Mobile Access Challenge

We live in a 24x7 work environment where employees must be productive regardless of the hour or location. In this age of “always-on” business we contend with the need to be in touch via push email, calendars, contacts and tasks. Mobile technologies free employees from the traditional restraints of geography. However, to fully leverage these technologies, mobile users must be able to easily and reliably access business collaboration applications from any device, whether laptop, PDA, or smart phone. Nokia Intellisync Mobile Suite (IMS) for Mirapoint enables mobile workers to communicate reliably and securely in real-time whenever - and wherever - they happen to be.

## Features and Benefits

### Anytime, Anywhere Connectivity

Nokia IMS for Mirapoint offers enterprise-wide mobility support for a wide range of devices over any network, including major mobile platforms such as Windows Mobile 5 and PalmOS 4.x, BREW-based phones like the RAZR, and next-generation cellular networks such as EV-DO and EDGE. Nokia IMS for Mirapoint connects to consumer mailboxes such as Yahoo!, AOL and Google Gmail, delivering a consistent graphical user interface (GUI) across all devices for a seamless user experience.

### Full Range of Features

Nokia IMS for Mirapoint gives users access to a broad range of standard email features including meeting request and attachments. Users have access to a rich complement of personal information management capabilities such as calendar, contacts, tasks and contact photos. The easy-to-install, flexible, scalable and modular architecture provides investment protection.

## Mobile-Enabled Email & Calendar

### Control

Device management capabilities enable IT organizations to control an ever-expanding mobile workforce. Nokia IMS for Mirapoint includes full user statistics and reporting tools, remote provisioning and remote lock-down of mobile devices that are lost or stolen. The enterprise maintains full control over the system with no dependencies on network operations centers or third-party providers while multi-site clustering and redundancy ensures high reliability.

### Security

Nokia IMS for Mirapoint provides sophisticated mobile security features and policy enforcement. End-to-end FIPS-certified, 128-bit AES encrypted connections to the mobile user's device via the Internet prevent information from getting into the wrong hands. Administrators can also lock down and wipe data from any device that is lost or stolen.

### Device Support

Nokia IMS for Mirapoint supports a wide variety of mobile devices on Windows, Symbian, BREW, Palm and J2ME mobile platforms.

### About Mirapoint

Mirapoint® is the market leader in appliance-based solutions for secure message networks in enterprise, service provider, and education organizations, with more than 115 million mailboxes served and secured worldwide. Customers use Mirapoint appliances including the Message Server mail appliance and RazorGate mail security appliance to build the messaging infrastructure that intelligently serves, secures and manages email. Mirapoint is headquartered in Sunnyvale, California, with offices throughout North America, Europe and Asia. For more information on Mirapoint, visit its website at [www.mirapoint.com](http://www.mirapoint.com).
